

CERTIFICATIONS 2025

INTRODUCTION

At Factory6, quality is a commitment we uphold across every phase of production. This deck outlines our current facility certifications, each renewed annually to ensure continued compliance with the highest standards in the nutraceutical industry.

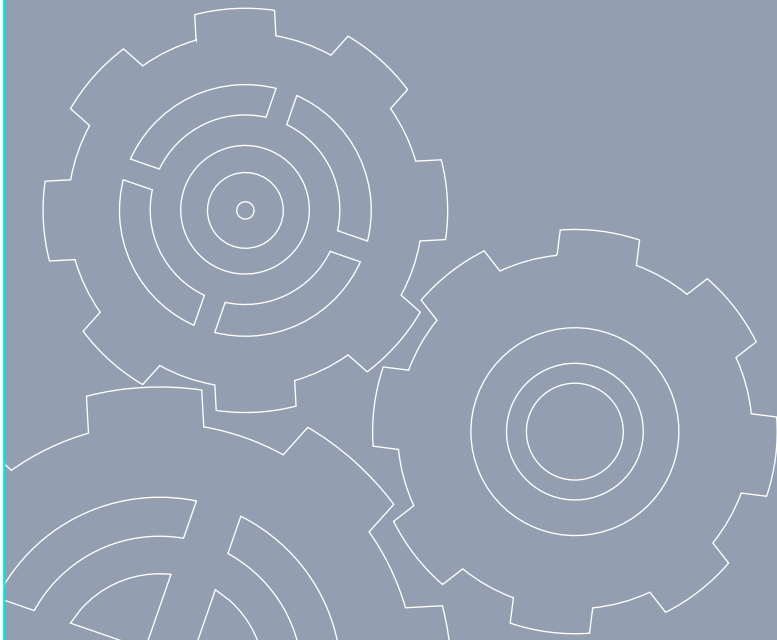

Our facility is NSF certified and operates in full compliance with cGMP (current Good Manufacturing Practices). These certifications reflect our dedication to producing safe, consistent, and regulatory-compliant products that support the growth and credibility of the brands we manufacture for.

We've implemented a robust quality assurance system that includes strict sanitation protocols, controlled production environments, and ongoing staff training. Our digital ERP (Enterprise Resource Planning) system ensures full traceability and specification adherence at every step — from raw material sourcing through final packaging.

These certifications are not just formalities; they're an extension of our promise to our partners: to deliver excellence with every product we make.
